Thanks Erin. Assuming ND to date has not requested a transfer, correct?
Steve

Subject: Bellefonte License Questions

Erin – we're preparing a REACTIVE Q&A for our TVA media rep for a vender open house that Nuclear Development is holding at Bellefonte this coming Monday (July 30). Bill Johnson will review the Q&A over the weekend so we need to get the draft to him this afternoon. I've been asked to include questions on the license, so need your help on the following.

- What's the status of the Bellefonte license? They have construction permits which are in deferred status.

What action will be necessary on the part of TVA for a license transfer? Is it initiated by Nuclear Development or TVA? ND is required to request transfer of the construction permits and must meet the applicable regulatory requirements as part of that request. TVA may be required to send a letter to the NRC consenting to the transfer.

- Assuming Nuclear Development could not seek transfer until the acquisition is completed, correct? ND is required to request the CP transfer prior to the sale being finalized.
- Would operating license application be done under Part 50, meaning they'd have to seek an operating license after completion? Yes, they will have to get a license.

Any other key considerations on the license we should be aware of?

Thanks for your help,
Steve

Subject: BLN Construction permits

ND plans on submitting an application to transfer the permits under 10CFR.50.80 and continuing their deferred status. Morgan Lewis is finalizing the details of the application and will reach out to TVA for any necessary support. Let me know if you need more information.
